FORM 2
MCH BUDGET DETAILS FOR FY 2010

[Secs. 504 (d) and 505(a)(3)(4)]

STATE: FL

1. FEDERAL ALLOCATION

(Item 15a of the Application Face Sheet [SF 424])
Of the Federal Allocation (1 above), the amount earmarked for:

\$ 19,167,334

A.Preventive and primary care for children:

\$ 6,846,572 (35.72%)

B.Children with special health care needs:

\$ 7,182,000 (37.47%)

(If either A or B is less than 30%, a waiver request must accompany the application)[Sec. 505(a)(3)]

C.Title V administrative costs:

\$ 1,916,733 (10%)

(The above figure cannot be more than 10%)[Sec. 504(d)]

2. UNOBLIGATED BALANCE (Item 15b of SF 424)

\$ 0

3. STATE MCH FUNDS (Item 15c of the SF 424)

\$ 169,587,822

4. LOCAL MCH FUNDS (Item 15d of SF 424)

\$ 0

5. OTHER FUNDS (Item 15e of SF 424)

\$ 0

6. PROGRAM INCOME (Item 15f of SF 424)

\$ 0

7. TOTAL STATE MATCH (Lines 3 through 6)

(Below is your State's FY 1989 Maintenance of Effort Amount)

\$ 155,212,322

\$ 169,587,822

8. FEDERAL-STATE TITLE V BLOCK GRANT PARTNERSHIP (SUBTOTAL)

(Total lines 1 through 6. Same as line 15g of SF 424)

\$ 188,755,156

9. OTHER FEDERAL FUNDS

(Funds under the control of the person responsible for the administration of the Title V program)

a. SPRANS: \$ 0

b. SSDI: \$ 94,644

c. CISS: \$ 0

d. Abstinence Education: \$ 2,521,581

e. Healthy Start: \$ 0

f. EMSC: \$ 0

g. WIC: \$ 206,263,845

h. AIDS: \$ 0

i. CDC: \$ 11,048,460

j. Education: \$ 0

k. Other: \$ 0

Others (see notes) \$ 39,266,239

USDA CACFP \$ 82,562,753

10. OTHER FEDERAL FUNDS (SUBTOTAL of all Funds under item 9)

\$ 341,757,522

11. STATE MCH BUDGET TOTAL

(Partnership subtotal + Other Federal MCH Funds subtotal)

\$ 530,512,678

FIELD LEVEL NOTES

1. **Section Number:** Form3_Main
Field Name: StateMCHFundsExpended
Row Name: State Funds
Column Name: Expended
Year: 2008
Field Note:
Due to budget reductions and economic downturn, spending goals set the previous year for this cycle were not reached. However, funds spent exceeded our match requirement.
2. **Section Number:** Form3_Main
Field Name: StateMCHFundsExpended
Row Name: State Funds
Column Name: Expended
Year: 2007
Field Note:
In Florida, we do not receive budget authority to allocate the entire budgeted amount.
3. **Section Number:** Form3_Main
Field Name: OtherFundsExpended
Row Name: Other Funds
Column Name: Expended
Year: 2007
Field Note:
In Florida, we do not receive budget authority to allocate the entire budgeted amount.
4. **Section Number:** Form3_Main
Field Name: OtherFedFundsExpended
Row Name: Other Federal Funds
Column Name: Expended
Year: 2008
Field Note:
Due to budget reductions and economic downturn, spending goals set the previous year for this cycle were not reached. However, funds spent exceeded our match requirement.
5. **Section Number:** Form3_Main
Field Name: OtherFedFundsExpended
Row Name: Other Federal Funds
Column Name: Expended
Year: 2007
Field Note:
In Florida, we do not receive budget authority to allocate the entire budgeted amount. When calculating expected federal funds two years ago, the total was overestimated. Actual other federal funding amount for this year was \$329,432,050.

FIELD LEVEL NOTES

1. Section Number: Form7_Main

Field Name: Children_0_1_TS

Row Name: Infants <1 year of age

Column Name: Title V Total Served

Year: 2010

Field Note:

Total infants on Form 6 differs from infants served under Title V on Form 7 because of the way Florida determines and counts the number of infants served by Title V. Infants served by Title V is the unduplicated count of clients <1 served in Healthy Start (program component 31) plus the unduplicated count of clients < 1 served in Child Health (program component 29).

2. Section Number: Form7_Main

Field Name: CSHCN_TS

Row Name: Children with Special Health Care Needs

Column Name: Title V Total Served

Year: 2010

Field Note:

Data Source: Florida Department of Health, Children's Medical Services (CMS). Data is compiled for the Federal Fiscal Year ending 9/30/2008 and reflects the primary source of coverage for CMS Network eligible children only. The data showed a total number of applicants of 67,318, of whom 5,168 did not meet the clinical eligibility criteria.

3. Section Number: Form7_Main

Field Name: AllOthers_TS

FORM 10
TITLE V MATERNAL & CHILD HEALTH SERVICES BLOCK GRANT
STATE PROFILE FOR FY 2010
[SEC. 506(A)(1)]
STATE: FL

1. State MCH Administration:
(max 2500 characters)

The Department of Health is the agency responsible for the administration of the Title V program in Florida. Maternal and child health responsibilities are divided between Family Health Services (pregnant women and children) and Children's Medical Services (children with special health care needs). The Department of Health administers health programs through its county health departments and Children's Medical Services offices. Healthy Start continues to be our priority maternal and child health initiative in Florida. Healthy Start is designed to ensure access to maternal and child health services to all women and children in Florida. Other efforts to improving maternal and child health include services to substance exposed newborns, Fetal and Infant Mortality Review projects, improving pregnancy outcomes, prenatal smoking cessation, and pregnancy associated mortality review. Services for children with special health care needs include the Early Intervention Program, high risk obstetrical satellite clinics, Regional Perinatal Intensive Care Centers and clinic-based medical and therapeutic care.

Block Grant Funds

2. Federal Allocation (Line 1, Form 2)	\$ 19,167,334
3. Unobligated balance (Line 2, Form 2)	\$ 0
4. State Funds (Line 3, Form 2)	\$ 169,587,822
5. Local MCH Funds (Line 4, Form 2)	\$ 0
6. Other Funds (Line 5, Form 2)	\$ 0
7. Program Income (Line 6, Form 2)	\$ 0
8. Total Federal-State Partnership (Line 8, Form 2)	\$ 188,755,156

9. Most significant providers receiving MCH funds:

Healthy Start Coalitions

10. Individuals served by the Title V Program (Col. A, Form 7)

a. Pregnant Women	120,165
b. Infants < 1 year old	71,404
c. Children 1 to 22 years old	228,786
d. CSHCN	76,332
e. Others	0

11. Statewide Initiatives and Partnerships:

a. Direct Medical Care and Enabling Services:

(max 2500 characters)

Children's Medical Services Integrated Service Delivery Network - A comprehensive continuum of medical and supporting services to eligible individuals with special health care needs. The system of care is a statewide integrated network of providers that includes local, regional and tertiary care facilities. Providers and families are supported through a case management system that includes nurse case managers, social workers and health care professionals. The service continuum includes prevention, early intervention, primary care and medical and therapeutic care. Child Health Services for Children under 1 - Child Health Services are provided mainly by the County Health Departments and include immunizations, periodic health history and physical examinations, laboratory screening tests for health indicators such as lead and anemia, developmental screening, risk assessment, parent education, accident prevention and substance abuse prevention education. Child Health is funded 100% by Title V.

b. Population-Based Services:

(max 2500 characters)

Pregnancy Associated Mortality Review (PAMR) project - a population-based surveillance and selective case review process that monitors trends in pregnancy associated deaths, and identifies gaps in care and systematic service delivery problems. Fetal and Infant Mortality Review (FIMR) Project - a community-based effort to provide quality improvement mechanisms that identify medical, psychosocial, environmental and structural factors that may contribute to fetal and infant deaths. Healthy Start Prenatal Screening - used to identify pregnant women who have an increased risk of pregnancy complications or poor birth outcomes due to environmental, medical, nutritional, or behavioral risk factors. Every pregnant woman is eligible for the screening process. Women at-risk may be eligible for care coordination and other services, based on need and local resources. Healthy Start Infant Screening - used to identify infants who are at increased risk of poor health or adverse development due to environmental, medical, nutritional, or behavioral risk factors. Every infant born in Florida is eligible for the screening process.

c. Infrastructure Building Services:

(max 2500 characters)

Healthy Start Coalitions - There are 30 Healthy Start Coalitions covering 64 of the 67 counties in Florida to ensure local leadership and planning for a system of care, to promote optimum health outcomes for pregnant women and infants. Additional capacity is provided through partnerships with the private sector, the public sector, state government, local government, community alliances, and maternal and child health care providers. Healthy Start Evaluation - The Healthy Start program includes an evaluation component of all Healthy Start services. This includes tracking the number of participants who receive Healthy Start services and comparing these numbers to indicators of improved pregnancy outcomes or infant developmental outcomes such as infant mortality, entry into prenatal care, and the number of sudden infant deaths.

12. The primary Title V Program contact person:

Field Level Notes

1. **Section Number:** Form11_Performance Measure #5

Field Name: PM05

Row Name:

Column Name:

Year: 2008

Field Note:

Data for 2008 comes from the 2005/2006 Florida State Profile data for CSHCN survey.

2. **Section Number:** Form11_Performance Measure #5

Field Name: PM05

Row Name:

Column Name:

Year: 2007

Field Note:

Indicator data comes from the National Survey of CSHCN, conducted by HRSA and CDC, 2005-2006. Compared to the 2001 CSHCN survey, there were revisions to the wording, ordering and the number of the questions used to generate the NPM05 indicator for the 2005-2006 CSHCN survey. The data for the two surveys are not comparable for PM #05.

3. **Section Number:** Form11_Performance Measure #5

Field Name: PM05

Row Name:

Column Name:

Year: 2006

Field Note:

The data reported in 2006 are pre-populated with the data from 2005 for this performance measure.

PERFORMANCE MEASURE # 06

The percentage of youth with special health care needs who received the services necessary to make transitions to all aspects of adult life, including adult health care, work, and independence.

Annual Objective and Performance Data					
	2004	2005	2006	2007	2008

1. **Section Number:** Form11_Performance Measure #6

Field Name: PM06

Row Name:

Column Name:

Year: 2008

Field Note:

Data for 2008 comes from the 2005/2006 Florida State Profile data for CSHCN survey.

2. **Section Number:** Form11_Performance Measure #6

Field Name: PM06

Row Name:

Column Name:

Year: 2007

Field Note:

Indicator data comes from the National Survey of CSHCN, conducted by HRSA and CDC, 2005-2006. Compared to the 2001 CSHCN survey, there were wording changes, skip pattern revisions, and additions to the questions used to generate the NPM06 indicator for the 2005-2006 CSHCN survey. There were also issues around the reliability of the 2001 data because of the sample size. The data for the two surveys are not comparable for PM #06 and the 2005-2006 may be considered baseline data.

3. **Section Number:** Form11_Performance Measure #6

Field Name: PM06

Row Name:

Column Name:

Year: 2006

Field Note:

The data reported in 2006 are pre-populated with the data from 2005 for this performance measure.

PERFORMANCE MEASURE # 07

Percent of 19 to 35 month olds who have received full schedule of age appropriate immunizations against Measles, Mumps, Rubella, Polio, Diphtheria, Tetanus, Pertussis, Haemophilus Influenza, and Hepatitis B.

Field Level Notes**1. Section Number:** Form11_Performance Measure #11**Field Name:** PM11**Row Name:****Column Name:****Year:** 2008**Field Note:**

Data for 2008 are not yet available. The Department of Health does not track breastfeeding data in the general population. The department has previously reported survey data from Ross Laboratories. Prior to 2005, the Department reported Ross data for the percentage of mothers in Florida who were breastfeeding in the hospital. In 2005, the Department began reporting Ross data for the percentage of mothers who were breastfeeding their infants at six months of age. However, Ross Laboratories has now ceased to conduct their Infant Feeding survey so data is no longer from this source. The Department now uses data provided by the CDC based on the National Immunization Survey. The CDC data is based on children born in 2004 and interviewed through November 2008.

2. Section Number: Form11_Performance Measure #11**Field Name:** PM11**Row Name:****Column Name:****Year:** 2007**Field Note:**

The Department of Health does not track breastfeeding data in the general population. Prior to 2005, the Department reported Ross data (collected from the annual Infant Feeding Survey conducted by Ross Laboratories) for the percentage of mothers in Florida who were breastfeeding in the hospital. Beginning with the data for 2005, the Department began reporting Ross data for the percentage of mothers who were breastfeeding their infants at six months of age. The data source changed in 2006 when Ross Laboratories ceased to conduct their annual Infant Feeding Survey. At this time, the Department began using data provided by the Centers for Disease Control (CDC) which is obtained from the National Immunization Survey. The CDC data presents breastfeeding information according to the year of the child's birth. The data reflected in the chart above under 2007 is still information collected on children born in 2004 and obtained in interviews conducted through December 2006.

3. Section Number: Form11_Performance Measure #11**Field Name:** PM11**Row Name:****Column Name:****Year:** 2006**Field Note:**

The Department of Health does not track breastfeeding data in the general population. The department has previously reported survey data from Ross Laboratories. Prior to 2005, the Department reported Ross data for the percentage of mothers in Florida who were breastfeeding in the hospital. In 2005, the Department began reporting Ross data for the percentage of mothers who were breastfeeding their infants at six months of age. However, Ross Laboratories has now ceased to conduct their Infant Feeding survey so data is no longer from this source. The Department will now begin to use indicator data provided by the CDC based on the National Immunization Survey. This data for 2005 is included. It is the latest data available.

Field Level Notes

1. **Section Number:** Form11_State Performance Measure #3

Field Name: SM3

Row Name:

Column Name:

Year: 2006

Field Note:

2004 estimates include those that reported "quitting" on the birth certificate in the numerator. Analysis against PRAMS has demonstrated this quit group is not valid for use in program and policy decision making. Data for 2005 and later year estimates exclude unknowns for smoking status and quits from the numerator and denominator. This removes a demonstrated bias from reporting that existed previously (2004).

STATE PERFORMANCE MEASURE # 4

The percentage of low-income children who access dental care

Annual Objective and Performance Data					
	2004	2005	2006	2007	2008

Field Level Notes**1. Section Number:** Form11_State Performance Measure #8**Field Name:** SM8**Row Name:****Column Name:****Year:** 2008**Field Note:**

Data for 2008 are not yet available. Requires matching infant death to births, and infant death records are not closed. Full data on infant deaths linked to births will not be available until April 2010.

2. Section Number: Form11_State Performance Measure #8**Field Name:** SM8**Row Name:****Column Name:****Year:** 2007**Field Note:**

Data for 2007 are not yet available.

3. Section Number: Form11_State Performance Measure #8**Field Name:** SM8**Row Name:****Column Name:****Year:** 2006**Field Note:**

Data for 2005 and 2006 are not yet available. The PPOR analysis uses birth record data linked to infant death data. Since infant death can occur up to 1 year from the date of birth, infant death data for a full year after the birth dates must be linked to the birth records. For births occurring in 2004, infant deaths occurring in 2004 and 2005 need to be linked to the births. Complete data for infant deaths occurring in 2006 will not be available until August of 2007 and plans are to have the linked file available in December 2007. The PPOR analysis for 2005 would be available by February 2008, and the PPOR analysis for 2006 would be available by February 2009.

These data are revised for 2002 and 2003 due to changes in the definition of the comparison group. This was necessitated by changes in the 2004 birth record.

Column Name:
Year: 2010
Field Note:
CMS contracts with the Family Resource Coalition, Inc, a non-profit corporation that provides family health partners to work in CMS offices throughout the state. The family health partners are parents of children with special health care needs and are chosen for their ability to help other parents in an advocacy, and support role.
2. **Section Number:** Form13_Main
Field Name: Question5
Row Name: #5. Family members hired as paid staff or consultants to the State CSHCN program...
Column Name:
Year: 2010
Field Note:
CMS has started family advisory councils in several area offices. The plan is to expand throughout all offices in the state.

FORM 14
LIST OF MCH PRIORITY NEEDS

[Sec. 505(a)(5)]

STATE: FL FY: 2010

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase, list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women, " and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

1. Improve preconceptional and interconceptional health and well-being.
2. Decrease racial disparities in maternal and child health outcomes.
3. Increase access to health care for the maternal and child health population, including children with special health care needs.
4. Decrease maternal, infant, and child morbidity.
5. Decrease maternal, infant, and child mortality.
6. Decrease risk factors associated with poor maternal and child health outcomes.
7. Decrease teen pregnancy.
8. Ensure consumer-friendly, culturally competent systems of care.
9. Increase statewide and local data and analysis capacity.
10. Increase awareness of public health preparedness issues unique to the maternal and child health population, including children with special health care needs.

FORM 16
STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET
STATE: FL

SP # 1

PERFORMANCE MEASURE:

The percentage of Part C eligible children receiving service

STATUS:

Active

GOAL

To increase the number of eligible children who receive a service.

DEFINITION

Numerator:

Number of eligible children who receive a service.

Denominator:

Number of children eligible.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

21.5 Clinical preventive services from publicly funded programs

DATA SOURCES AND DATA ISSUES

Department of Health data

SIGNIFICANCE

Increasing the percentage of Part C eligible children receiving a service has a positive effect on the outcome measures related to reducing infant, neonatal, postneonatal and perinatal morbidity.

SP # 2

PERFORMANCE MEASURE:

The percentage of subsequent births to teens age 15 to 19

STATUS:

Active

GOAL

To lower the percentage of subsequent births to teens age 15 to 19.

DEFINITION

Numerator:

Numerator: Number of females under 19 with a second or higher order birth in the last five years.

Denominator:

Denominator: Number of live births to females age 15-19 in the calendar year.

Units: 100 **Text:** percent

HEALTHY PEOPLE 2010 OBJECTIVE

Objective 5.1

Reduce repeat births among females age 15-19.

DATA SOURCES AND DATA ISSUES

Vital records are the source of data on mother's age and births. Population numbers are determined from Vital Statistics records of teens with a second or higher order birth.

SIGNIFICANCE

DHHS made teen pregnancies a priority goal (a major threat to healthy and productive lives) in their 1997 strategic plan. A second teen birth is associated with the lack of high school completion, inability to work, solidifying the cycle of poverty for young mothers, and creating welfare dependency.

SP # 3

PERFORMANCE MEASURE:

The percentage of women reporting tobacco use during pregnancy

STATUS:

Active

GOAL

To decrease the percentage of women who report tobacco use during pregnancy on the certificate of live birth.

DEFINITION

Numerator:

Number of women who report tobacco use on the certificate of live birth.

Denominator:

Number of births in Florida.

Units: 100 **Text:** percent

HEALTHY PEOPLE 2010 OBJECTIVE

3.7 Smoking cessation during pregnancy

Increase smoking cessation during pregnancy so that at least 60 percent of women who are cigarette smokers at the time they become pregnant quit smoking early in pregnancy and maintain abstinence for the remainder of their pregnancy.

DATA SOURCES AND DATA ISSUES

The data source is the Florida Department of Health, Vital Statistics Office. The data is taken directly from the Certificate of Live Birth data.

SIGNIFICANCE

Reducing tobacco use during pregnancy has a positive effect on reducing the infant, neonatal, postneonatal and perinatal mortality rates and on lowering the number of low birth weight deliveries..

SP # 4

PERFORMANCE MEASURE:

The percentage of low-income children who access dental care

STATUS:

Active

GOAL

To increase access to dental services for low-income children in order to provide clinical preventive and treatment services needed to improve and maintain oral health.

DEFINITION

Numerator:

Number of children who receive services through Medicaid providers, county health departments and community health centers.

Denominator:

The number of low-income children below 200% of the federal poverty level.

Units: 100 **Text:** percent

HEALTHY PEOPLE 2010 OBJECTIVE

13.2 Untreated dental caries

Reduce untreated dental disease to no more than 20 percent among children 6 through 8 and no more than 15 percent among adolescents age 15.

DATA SOURCES AND DATA ISSUES

Data are compiled from annual ad hoc reports provided by the Medicaid program, from county health department data maintained by the Public Health Dental Program, and community health center data extracted from the annual Uniform Data System report.

SIGNIFICANCE

Low-income children are at high risk for dental disease because of the lack of access to professional care. Dental caries is the most common chronic disease of children, but amenable to early intervention. Early dental disease can be reversed and more advanced disease can be treated before it progresses to pain, infection and the need for more expensive intervention.

SP # 5

PERFORMANCE MEASURE:

The percentage of pregnant women screened by Healthy Start

STATUS:

Active

GOAL

To achieve universal screening that will identify pregnant women who are at increased risk for preterm delivery or who are at increased risk for delivering a low birth weight infant.

DEFINITION

Numerator:

Number of screens completed

Denominator:

Number of births for same time period

Units: 100 **Text:** percent

HEALTHY PEOPLE 2010 OBJECTIVE

14.5 Low birth weight

Reduce low birth weight to an incidence of no more than 5 percent of live births and very low birth weight to no more than 1 percent of live births.

DATA SOURCES AND DATA ISSUES

The data source is the Florida Department of Health, Vital Statistics Office. In previous years, objectives related to Healthy Start prenatal screening rates have been measured by the percent of women offered the screening. Recent data analysis has focused instead on the number/percent of women actually screened. This number is generated by using the number of births for the same time period as the denominator. This results in a much lower rate, but ultimately the one that shows participation in prenatal risk screening. This denominator used is a proxy for the estimated number of pregnant women because in Florida there is not a data system that captures the actual number of pregnant women. Thus, although this is an imperfect measure, used over time it should provide an indication of improvement or lack of improvement of the prenatal screening rates.

SIGNIFICANCE

The ability to identify high risk pregnant women is critical to the ability to assess and provide interventions to address the identified risk factors and improve pregnancy outcomes. Additionally, the data collected through the prenatal screening process enables the statewide analyses of risk factors for pregnant women in Florida.

SP # 6

PERFORMANCE MEASURE:

The percentage of infants screened by Healthy Start

STATUS:

Active

GOAL

To achieve universal screening that will identify infants who are at increased risk for post-neonatal death.

DEFINITION

Numerator:

Number of screens completed

Denominator:

Number of births for same time period

Units: 100 **Text:** percent

HEALTHY PEOPLE 2010 OBJECTIVE

14.1 Infant mortality

Reduce the infant mortality rate to no more than 7 per 1,000 live births.

DATA SOURCES AND DATA ISSUES

The data source is the Florida Department of Health, Vital Statistics Office. The data for the infant screen is taken directly from the Certificate of Live Birth.

SIGNIFICANCE

The ability to identify high-risk infants is critical to the ability to assess and provide interventions to address the identified risk factors and improve outcomes during the first year of life. Additionally, the data collected through the infant screening process enables the statewide analyses of risk factors for infants in Florida.

SP # 7

PERFORMANCE MEASURE:

The rate per 1,000 of hospital discharges due to asthma in children 0-14

STATUS:

Active

GOAL

To reduce the number of hospitalizations due to asthma in children age 0-14.

DEFINITION

Numerator:

Number of hospital discharges due to asthma in children age 0-14

Denominator:

Total population of children age 0-14

Units: 1000 **Text:** 2

HEALTHY PEOPLE 2010 OBJECTIVE

11.1 Asthma hospitalizations

Reduce asthma morbidity among children, as measured by a reduction in asthma hospitalizations to no more than 225 per 100,000 people.

DATA SOURCES AND DATA ISSUES

Hospital discharge data

SIGNIFICANCE

Asthma affects over 100 million people worldwide and creates a burden in health care costs, lost productivity, increased absenteeism from school, and reduced participation in family life. Asthma prevalence is increasing most rapidly among children, especially where urbanization is taking place. Effective asthma management and prevention can prevent costly hospitalizations, and decrease school and work absenteeism.

SP # 8

PERFORMANCE MEASURE:

Excess fetoinfant mortality attributed to the maternal health/prematurity category in the PPOR statewide analysis.

STATUS:

Active

GOAL

To decrease the excess fetoinfant death attributable to maternal health/prematurity.

DEFINITION

Using the Perinatal Periods of Risk Analysis, when compared to a statewide reference group, the excess fetal deaths with gestational ages 24 weeks or greater and fetal and infant deaths with birth weights of 500 grams or greater that are attributable to the maternal health/prematurity category. Units: Difference in excess fetoinfant mortality between reference group and non-reference group.

Numerator:

Denominator:

Units: 1000 **Text:** Rate

HEALTHY PEOPLE 2010 OBJECTIVE

Objective 16-1a

Fetal deaths at 20 or more weeks of gestation (Baseline 6.8 in 1997)

Objective 16-1b

Fetal and infant deaths during perinatal period (28 weeks of gestation to 7 days or more after birth) (Baseline 7.5 in 1997)

DATA SOURCES AND DATA ISSUES

Birth records matched to infant death records and fetal death records.

SIGNIFICANCE

Recent perinatal periods of risk analysis have indicated that there is substantial opportunity for improvement in the area of maternal health and prematurity. Preconceptional and interconceptional care for women may result in lower excess rates of fetoinfant death attributable to this category.

FORM NOTES FOR FORM 16

FORM 17
HEALTH SYSTEMS CAPACITY INDICATORS
FORMS FOR HSCI 01 THROUGH 04, 07 & 08 - MULTI-YEAR DATA
STATE: FL

Form Level Notes for Form 17

None

HEALTH SYSTEMS CAPACITY MEASURE # 01

The rate of children hospitalized for asthma (ICD-9 Codes: 493.0 -493.9) per 10,000 children less than five years of age.

	<u>Annual Indicator Data</u>				
	2004	2005	2006	2007	2008
Annual Indicator	54.9	40.9	37.1	39.2	33.3
Numerator	5,789	5,307	4,910	4,375	3,736
Denominator	1,054,829	1,298,296	1,323,696	1,117,411	1,122,596

Check this box if you cannot report the numerator because
 1. There are fewer than 5 events over the last year, and
 2. The average number of events over the last 3 years is fewer
 than 5 and therefore a 3-year moving average cannot be
 applied.

(Explain data in a year note. See Guidance, Appendix IX.)

Is the Data Provisional or Final?

Final

Provisional

Field Level Notes

None

HEALTH SYSTEMS CAPACITY MEASURE # 02

The percent Medicaid enrollees whose age is less than one year during the reporting year who received at least one initial periodic screen.

	Annual Indicator Data				
	2004	2005	2006	2007	2008
Annual Indicator	81.7	81.7	100.0	100.0	
Numerator	137,071	143,510	139,614	141,849	
Denominator	167,705	175,700	139,614	141,849	

Check this box if you cannot report the numerator because
1. There are fewer than 5 events over the last year, and
2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied.

a) <i>Infants (0 to 1)</i>	2007	_____
b) <i>Medicaid Children</i> (Age range <u> </u> 1 to <u> </u> 6) (Age range <u> </u> 6 to <u> </u> 18) (Age range <u> </u> to <u> </u>)	2007	200 200
c) <i>Pregnant Women</i>	2007	_____

FORM NOTES FOR FORM 18

None

FIELD LEVEL NOTES

1. **Section Number:** Form18_Indicator 06 - SCHIP
Field Name: SCHIP_Infant
Row Name: Infants
Column Name:
Year: 2010
Field Note:
In Florida, Medicaid covers infants up to 200 percent of poverty.
2. **Section Number:** Form18_Indicator 06 - SCHIP
Field Name: SCHIP_Women
Row Name: Pregnant Women
Column Name:
Year: 2010
Field Note:
In Florida, pregnant women are not eligible for SCHIP coverage.
3. **Section Number:** Form18_Indicator 05
Field Name: CareFirstTrimester
Row Name: Percent of infants born to pregnant women receiving prenatal care beginning in the first trimester
Column Name:
Year: 2010
Field Note:
Percent of infants born to women who began care in the first trimester differs from the values provided on Form 11 NPM #18 because births with unknown linking information are excluded.
4. **Section Number:** Form18_Indicator 05
Field Name: AdequateCare
Row Name: Percent of pregnant women with adequate prenatal care
Column Name:
Year: 2010
Field Note:
Data for "all" column differ from numbers reported elsewhere in report, as this data comes from a different source. Source for this data looks at matched data files that exclude those without an SSN number. In the case of multiple births, multiple births are counted as one delivery, further skewing the results. Data for this indicator is more accurately reflected on Form 17.

FORM 19

FIELD LEVEL NOTES

1. Section Number: Form21_Indicator 09A

Field Name: HSIRace_Children

Row Name: All children 0 through 19

Column Name:

Year: 2010

Field Note:

"All", "White", and "Black" estimates come from 2008 Florida CHARTS population projections: <http://www.floridacharts.com/charts/population.aspx>. Estimates for the total number in the other racial and ethnic groups come from the 2005-2007 American Community Survey: http://factfinder.census.gov/servlet/CustomTableServlet?_ts=195386930898. This total number is then converted to a percentage of the total Florida 0-19 year old population using the 2005-07 American Community Survey. This proportion is then applied to the "Total All Races" in Column 1, Row 1 of this form, and the resulting number deducted from the "Other and unknown" in Column 9, Row 1 and placed in the proper race column of Row 1. When the total from the American Community Survey generated estimates is greater than the "Other and unknown" in Column 9, Row 1, then a "0" is placed in this cell, and the American Community Survey generated estimates are recalculated in proportion to the "Other and unknown" total.

2. Section Number: Form21_Indicator 09A

Field Name: HSIRace_SingleParentPercent

Row Name: Percent in household headed by single parent

Column Name:

Year: 2010

Field Note:

Estimated based on the 2006 American Community Survey: http://factfinder.census.gov/servlet/IPCharItrationServlet?_ts=195391731667. Percent of children under 18 living in single-parent female household: The number of race or ethnicity category households multiplied by the percentage of female/male only households, where there is no husband/wife, but there is a child <18 years that is her/his own; divided by the total number of children in race or ethnicity category.

3. Section Number: Form21_Indicator 09A

Field Name: HSIRace_TANFPercent

Row Name: Percent in TANF (Grant) families

Column Name:

Year: 2010

Field Note:

The source for this data includes Hispanic as a race. To estimate counts that would include Hispanic ethnicity in the race categories, The Florida Department of Health, Office of Planning, Evaluation, and Data Analysis provided projections for the 2008 population of 0-19 year olds by race-ethnicity. The proportion of Hispanics were calculated by race from the Office of Planning, Evaluation, and Data Analysis projections. These proportions were then applied to the count of Hispanics provided by the data source. These values were then added to the appropriate race category above to attain a total under each race category that included Hispanic ethnicity. Finally, this count value was used to calculate column percentages. For 2008, the projected percentage of Hispanics that were White was 94.24%; the percentage of Hispanics that were Black was 4.37%; and the percentage of Hispanics that were Other was 1.39%.

4. Section Number: Form21_Indicator 09A

Field Name: HSIRace_MedicaidNo

Row Name: Number enrolled in Medicaid

Column Name:

Year: 2010

Field Note:

When an estimate cannot be provided for a specific race category, then the overall value for all races is used. In the case of counts, the estimated numbers based on the overall value is subtracted from the "Other and Unknown" column value.

The source for this data includes Hispanic as a race. To estimate counts that would include Hispanic ethnicity in the race categories, The Florida Department of Health, Office of Planning, Evaluation, and Data Analysis provided projections for the 2008 population of 0-19 year olds by race-ethnicity. The proportion of Hispanics were calculated by race from the Office of Planning, Evaluation, and Data Analysis projections. These proportions were then applied to the count of Hispanics provided by the data source. These values were then added to the appropriate race category above to attain a total under each race category that included Hispanic ethnicity. Finally, this count value was used to calculate column percentages. For 2008, the projected percentage of Hispanics that were White was 94.24%; the percentage of Hispanics that were Black was 4.37%; and the percentage of Hispanics that were Other was 1.39%.

5. Section Number: Form21_Indicator 09A

Field Name: HSIRace_SCHIPNo

Row Name: Number enrolled in SCHIP

Column Name:

Year: 2010

Field Note:

The source for this data includes Hispanic as a race. To estimate counts that would include Hispanic ethnicity in the race categories, The Florida Department of Health, Office of Planning, Evaluation, and Data Analysis provided projections for the 2008 population of 0-19 year olds by race-ethnicity. The proportion of Hispanics were calculated by race from the Office of Planning, Evaluation, and Data Analysis projections. These proportions were then applied to the count of Hispanics provided by the data source. These values were then added to the appropriate race category above to attain a total under each race category that included Hispanic ethnicity. Finally, this count value was used to calculate column percentages. For 2008, the projected percentage of Hispanics that were White was 94.24%; the percentage of Hispanics that were Black was 4.37%; and the percentage of Hispanics that were Other was 1.39%.

6. Section Number: Form21_Indicator 09A

Field Name: HSIRace_JuvenileCrimeRate

Row Name: Rate (per 100,000) of juvenile crime arrests

Column Name:

Year: 2010

Field Note:

When an estimate cannot be provided for a specific race category, then the overall value for all races is used. In the case of counts, the estimated numbers based on the overall value is subtracted from the "Other and Unknown" column value.

7. Section Number: Form21_Indicator 09A

Field Name: HSIRace_DropOutPercent

Row Name: Percentage of high school drop-outs (grade 9 through 12)

Column Name:

Year: 2010

Field Note:

When an estimate cannot be provided for a specific race category, then the overall value for all races is used. In the case of counts, the estimated numbers based on the overall value is subtracted from the "Other and Unknown" column value.

8. Section Number: Form21_Indicator 09B

Field Name: HSIEthnicity_Children

Row Name: All children 0 through 19

Column Name:
